This is Norsup

Want to enjoy the luxury of your own swimming pool but also minimise costs and environmental impact? Upgrade to an eco-friendly swimming pool and dive into a world of benefits!

At Norsup, we believe in the power of water and translate this simplicity into innovative, top-quality swimming pool and water technology. With advanced apps, we provide a clear and focused service for installation and maintenance, ensuring your swimming pool operates effortlessly and worry-free.

High-end Norsup range

Discover our exclusive Norsup range, featuring the best swimming pools, pumps, heat pumps, water treatment, and top-quality filters. Our range is continuously expanding with new products, allowing us to offer a complete line of swimming pool materials for a start-to-finish installation. Each product is carefully designed to work seamlessly together, guaranteeing a complete and optimally functioning system. Additionally, we provide all spare parts from stock, enabling you quick and easy maintenance.

Upgrade to an eco-friendly swimming pool today and take the plunge into a greener, cost-effective, and enjoyable swimming experience!

Exclusively available through selected dealers

The Norsup range is exclusively available through carefully selected dealers. These are professional installers with a high level of service and trained in Norsup technology. They are experts who understand the meaning and value of Norsup products, enabling them to construct and maintain swimming pools and all equipment with extra care.

Learn more about
our dealers

1

Eco-friendlier devices

The devices included in NorsupOne package are more energy efficient.

2

Economical use of products

Thanks to the accurate data analysis of the NorsupOne controller, products are only refilled or replaced when needed.

3

Remotely controlled by app

With the NorsupOne app, you have control over all the devices and various aspects of the pool.

4

Notification for part replacement

The NorsupOne app indicates when a device or its components require replacement or maintenance, ensuring that you can always enjoy your pool to the fullest.

5

Professionally trained installers

The Norsup range is exclusively available through carefully selected dealers who are professional installers with a high level of service and are trained in Norsup's technology.

Your sustainable solution

Experience significant cost savings with energy-efficient equipment, such as variable-speed pumps and inverter heat pumps, reducing your energy bills. Say goodbye to excessive chemical usage as we employ alternative sanitation methods for cleaner, healthier water.

With water-saving features like covers and efficient filtration systems, you'll conserve water and cut down on expenses.

Not only will you be saving money, but you'll also be contributing to a cleaner planet. Our eco-friendlier pools promote responsible water management.

2

Eco-friendly devices

At Norsup, we believe in sustainable solutions that allow us to enjoy our pools without burdening our planet.

- Variable speed circulation pump ensures the pump runs at a lower flow rate.
- Full inverter heat pump offers the ability to vary heating capacity to suit weather conditions. SmartGrid technology enables it to work seamlessly with future smart energy networks (e.g. solar panels).
- Salt electrolysis and UV treatment require less chemicals than traditional methods.
- NorsupOne controller centrally monitors all the devices which ensures all the devices run in the most efficient & economical way all the time.
- The accurate data analysis of the NorsupOne controller reminds you to use disinfection products only at the right moment and replace consumable parts such as cells, probes, and UV lamps when needed. This prevents unnecessary waste and further reduces usage costs.

Norsup's sustainable technologies allow you to fully enjoy the pool while also helping to maximise the lifespan of the devices, run the pool in the most economical way, and minimise the impact on the environment.

Having a swimming pool doesn't have to come at the expense of the environment or our health.

3 All-in-one app

Control your pool from the palm of your hand

With the NorsupOne app, you have control over all the devices and various aspects of the pool, such as pH and salt levels, adjusting water temperature, turning on lights, and viewing and tracking histories, all through a single application. The entire pool is within easy reach.

Easy maintenance

The NorsupOne app indicates when a device or part of it needs replacement or maintenance. It can even notify your installer to plan maintenance for your pool. This way, you can always enjoy your pool to the fullest, and parts are only replaced when necessary to avoid unnecessary costs.

system is so
convenient”

4

Complete NorsupOne package

Thanks to Norsup's extensive product range, you will always find the products to suit your needs. The NorsupOne package ensures fast installation and efficient pool maintenance. In addition, Norsup also offers the possibility to add extras or customise the package to your own needs. Contact us for more information on the various options.

Norsup offers high quality products and comprehensive aftersales support.

Immediate warnings & alarms

Both the pool user and the dedicated installer will receive immediate warnings and alarms when any abnormal situation is detected. This allows either the pool user or the installer to proactively resolve issues before they escalate.

Maintenance notifications

Pool users will receive notifications for parts replacement and required maintenance, which helps maximise the lifespan of the devices and keep the pool in the best condition.

The NorsupOne package contains the following:

In this picture the control unit is shown together with the salt chlorinator.

Control Unit type NorsupOne V2

NorsupOne is an intelligent controller for pools and spas, with sensor and actuator software. It provides complete automation and management of your pool equipment, including push alerts in case of anomalies. NorsupOne provides worry-free management of treatments, water balance, filtration, heating and lighting. It is used in combination with the chlorine and pH dosing unit or the salt chlorinator.

- Complete automation and pool management
- Remotely monitoring & control
- Error & alarm notification

BETTER THAN A SINGLE SPEED PUMP BECAUSE THE PUMP AUTOMATICALLY ADJUSTS ITS SPEED

VSD pool pump type EVO pro

This pump has integrated controls and programmable functions. The timer allows you to set five speeds at specific times. The pump has a skimmer function to remove debris from the surface of the water. It can be connected to a variety of existing systems.

- Energy label A
- High efficiency
- Silent running
- Timer & speed setting
- Skimmer function for cleaning water surface
- Salt water resistant to 0.4% (4gr/ltr)

3

MORE SUSTAINABLE THAN
AN ON/OFF HEAT PUMP
BECAUSE OF LOWER POWER
CONSUMPTION

Heat pumps

The Norsup full inverter heat pumps adjust the fan speed from 10% to 100% depending on temperature. This reduces energy consumption and noise levels. The pumps quickly reach the desired temperature and has a touchscreen operation. Different types available.

- Energy label A
- Full inverter
- High efficiency with COP up to 16
- Silent running
- Green refrigerant R32
- Touchscreen & Wi-Fi control

5a

MORE SUSTAINABLE
THAN A SAND
FILTER BECAUSE IT
SAVES MORE WATER

Cartridge filter

Norsup cartridge filters require less energy and water to filter your pool water. There is no backwashing needed, which saves a dramatic amount of water.

- 1.5" bottom drain plug allowing efficient winterisation & simple cleaning & rinsing with a standard garden hose
- Water saving design with no backwash required

4

MORE SUSTAINABLE
BECAUSE LESS
CHEMICALS ARE NEEDED

UV disinfection type Supernova

The Norsup Supernova UV disinfection system provides clean and clear water in an efficient and environmentally friendly way. The duplex stainless steel housing makes it suitable for all pools. The Amalgam lamp replaces the traditional UV-C lamp for higher and more stable performance. The upgrade, Norsup Supernova timer, has an LCD display and timer function for lamp replacement.

- Duplex housing suitable for chlorinated, saltwater and bio pools
- Protects the pool from pathogenic organisms
- Controls the formation of mold, bacteria and algae
- Can reduce the use of chlorine and other chemicals by up to 80%
- Prevents chlorine odour and irritation to skin and eyes
- Better for the environment than traditional ways

5b

Sand filters

Norsup offers sand filters with polypropylene material or fibreglass reinforced polyester. The high quality of material and the decades of manufacturing experience ensure an extremely long lifespan.

- Premium quality
- High working pressure up to 3.75 bar
- Premium 6 way valves

Salt chlorinator type OceanClear LS

Norsup salt chlorinator, ideal for private pools up to 100m³. Easy installation with plug-and-play kit for cell, pH and redox probe. User-friendly LCD interface displays water temperature, pH, salt level and chlorine production. Smart Power® technology ensures stable chlorine production and cell self-cleaning. Combine with NorsupOne Controller and app for wireless control and expanded functionality.

- Amount of salt 1.5g/l, chlorine production 20g/h
- Self-cleaning cell
- Warnings & alarms on the display
- Automatic winterising & opening of pool
- Diagnostic program & event history for easy maintenance

Automatic cleaning robot type AquaRacer

The Norsup AquaRacer cleans your swimming pool quickly. It cleans floors, walls and water surfaces and has smart route planning. When he's done, he parks neatly next to the pool. Various programs can be set with the app. The AquaRacer is not yet integrated into the NorsupOne app.

- For all types of swimming pools
- Battery life up to 6 hours of cleaning time
- 6 liter filter
- Detects obstacles and navigates around them
- Easy to maintain
- Active inverter brush of 200 RPM, cleaning speed of 0.5 m/s, water output of 250 l/min
- Operable with remote control and app

Automatic dosing system - chlorine & pH

Norsup's automatic dosing system is ideal for private pools up to 100m³. It is easy to install, includes pH and redox probes, plug-and-play kit and temperature sensor. A smart, user-friendly LCD interface displays water temperature, pH and chlorine levels. The system also offers pH and ORP calibration, a Boost mode for prolonged chlorine dosing, and Low mode to adjust chlorine dosing according to pool cover operation.
